PROGRAMME OUTCOME

PO1- Understand society: Sociology as a discipline acquaints us with basic concepts and perspectives required to understand and analyse human societies. The relationship between individual and society is a complex subject and sociology tries to engage with it through multiple perspectives. The programme seeks to achieve a comprehensive understanding among the learners about social structures, social institutions and social processes by acquainting them with various sociological concept and theories.

PO2-Critical thinking- Sociology as a discipline begins from common sense but parts ways with it to reveal underlying patterns of social organisation in human societies. The discipline achieves this by empowering its students with critical thinking which questions everyday common-sense assumptions about the society we live in. One of the first teachings of this discipline is this critical insight- the programme trains the students to question commonly held assumptions about societies they live in and enables them to look beyond that which is apparent. This is achieved by a rigorous training in critical thinking and questioning of popularly held assumptions. Students apply such thinking in their research projects which they submit in their final year. Some of the research projects conceived by students as a part of the

programme over the years include- understanding the latent and manifest role of religion in pandemic, a study on ageing and its socio-cultural connotations, the subject of conspicuous consumption in online shopping and the internet as a site for presentation of selves.

PO3- Empathy and acceptance of differences- Sociology empowers students to relate and empathise with diverse points of views on a subject. In a largely multi-cultural world one of the core values is that of empathy. The programme achieves this by offering courses on religion, gender, sexuality and social movements. The discussions on movements and issues of fluid identities sensitize learners to multitude of belief systems and empowers them to empathise and accept differences intellectually. This makes them more tolerant, empathetic and better equipped to work in diverse cultural environments.

PO4-Communication-Sociology programme enables effective written, spoken and non-verbal communication through regular term papers, assignments, class presentations and strong observation skills which help decipher culturally laden gestures, signs and symbols. Students are encouraged to develop communication skills and are taught how to write original research papers with proper referencing. Their verbal skills are honed by encouraging them to articulate their views on complex contemporary issues during invited lectures, webinars and presentations.
